## BODY WRAP

### WHAT IS CELLULITE?

Uneven deposits of water, waste, and toxins that have become trapped in the connective tissues just below the skin's surface

- Toxic Accumulation
- Fluid Retention
- Poor Circulation
- Poor Lymphatic Flow
- Lack Of Exercise
- Nutrient Deficiency
- Toxic Colon

### LYMPHATIC SYSTEM

Network of vessels through which lymph drains from tissues into the blood

Called the "River of Life" and an important component of our immune system

Sweeps away toxins, bacteria, germs, mutant cells and harmful substances

Carries toxins in lymph through the thoracic valve of the heart and into the blood stream to be filtered by the liver and eliminated by the kidneys

Has more mileage than the circulatory system and permeates all organs except brain

Stimulated by exercise, massage, dry brushing, and the M'lis Body Contour Wrap

If lymph flow is weak harmful toxins, viruses and bacteria will not be completely eliminated and can re-emerge 30-50 years later

### M'lis CONTOUR PROGRAM

- Cleanses liquid waste system
- Cleanses connective tissues
- Softens and breaks down toxins and waste
- Stimulates circulation to aid in healing
  - Reduces water retention
  - Tightens and tones the skin
- Lose one half dress or pant size per treatment
- Critical part of the M'lis Health Program
- Particularly Fibromyalgia, Candida, Weight Loss or any health issue that involves a depleted immune system
